

EDUCATION & ACADEMIC PERFORMANCE

Serampore Vivekananda Academy | Senior Secondary (Class 11–12, Science Stream)

2024 – 2026

- **Academic Score:** Achieved **75% Aggregate Score** in Higher Secondary Class 12 Board Examinations.
- **Science Subjects:** Mathematics, Physics, Chemistry, Biology, English, and Physical Education.

Serampore Vivekananda Academy | Secondary (Class 9–10)

2022 – 2024

- **Academic Score:** Achieved **89% Overall Aggregate** on Class 10 Secondary Board Examinations.
- **Mathematics Award:** Recognized as the **Class Subject Topper in Mathematics** for earning the highest marks in class.

Baidyabati Sacred Heart | Primary & Middle School (Class 1–8)

2014 – 2022

- **Medium of Instruction:** 100% English Medium schooling completed continuously from Class 1 through Class 12.

PRACTICAL WORKFLOW & LEARNING APPROACH

AI-Assisted Building:	Use modern AI tools (Cursor, Claude, ChatGPT) to generate starter code, structure web layouts, debug errors, and turn ideas into working applications quickly.
Applied Physics & Math:	Apply classroom geometry, trigonometry, and vector principles to build interactive 2D graphics, game loops, bounce angles, and surface friction models.
Web Hosting & Deployment:	Deploy self-built projects live on the internet using hosting services like Vercel and Firebase so they can be viewed online.
Code Tracking:	Organize, update, and publish project source code publicly on GitHub.

FEATURED SELF-BUILT PROJECTS

OfferIntel — Job Offer Comparison Tool | Web Application

[\[Live Demo \]](#)

- **What it does:** Built a web application designed to help job seekers compare different job offers by looking beyond base salary—evaluating performance bonuses, stock options, health benefits, and growth potential.
- **How it works:** Created input forms and calculation rules that weigh different offer components to produce a clear, side-by-side comparison overview.
- **Key Feature:** Integrated user sign-in so users can securely save their offer calculations and revisit them anytime.

FreeStack — Developer Resource Directory | Web Directory

[\[Live Demo \]](#)

- **What it does:** Created an organized online directory to help beginner coders quickly find useful learning resources, coding templates, and free developer tools.
- **How it works:** Built a instant search bar and category filters (such as Frontend, Backend, Design, and AI tools) for easy browsing.
- **Key Feature:** Published and hosted live on the web for community use.

FEATURED SELF-BUILT PROJECTS (CONTINUED)

2D Physics Games (Tank Shooter & Carrom Football) | Browser Games

[\[Live Demo \]](#)

- **What it does:** Built two playable 2D arcade games in the browser to experiment with physics formulas and game loops directly on screen.
- **How it works:** Programmed ball bounce angles, surface friction slowdown, trajectory paths, and collision reactions using coordinate math.
- **Key Feature:** Features real-time sound effects and smooth animation movement.

Interactive Developer Portfolio & Web Terminal | Interactive Website

[\[Live Demo \]](#)

- **What it does:** Designed a personal portfolio website featuring both a clean standard web interface and an interactive computer terminal simulation.
- **How it works:** Visitors can type simple commands (like `help` or `projects`) into the terminal box to view project information dynamically.
- **Key Feature:** Includes detailed descriptions of various developer roles and self-built projects.

Interactive Web Chess & Online Shop Showcase | Web Showcase

[\[Live Demo \]](#)

- **What it does:** Built a playable web chess game along with a modern dark-themed online store interface ('Scentscape').
- **How it works:** Programmed basic chess piece rules and move validation so players can make valid chess moves on screen.
- **Key Feature:** Demonstrates clean visual layouts, interactive button controls, and responsive page design.
